Rain Gauge Care

• Clean with a soft damp cloth. Do not use caustic cleaners that could mar polished surface of rain gauge or tipping cups. Cleaners that could mar polished surface of rain gauge or tipping cups may not flow correctly through the rain gauge.

• Clear debris from rain gauge funnel. When dirty, rain gauge could be damaged if residual water freezes within unit.

• Increase the separation between the equipment and the receiver.

• Reorient or relocate the receiving antenna.

• Consult the dealer or an experienced radio/TV technician for help.

• Increase the power of the source to which the receiving equipment is connected.

• Move the equipment away from the receiver.

• Plug the equipment into a different outlet to avoid using the same circuit to which the receiver is connected.

• Add shielding to the equipment cables.
